Bring-A-Guest Event

Airflow Measurement & Control for Today's High-Performance Buildings

Myrtle Beach, SC

- March 5 - 6
- April 30 - May 1
- September 17 - 18
- October 22 - 23

What To Expect

Join us for a 2-day, comprehensive event and seminar session focused on improving Indoor Air Quality (IAQ) and ensuring ventilation code compliance through accurate measurement and control of building airflow rates.

You'll explore proven methods and solutions for monitoring outdoor air delivery, maintaining building pressurization, and meeting ASHRAE 62.1 and IMC ventilation requirements. Sessions also cover strategies for controlling airflow to optimize thermal comfort, reduce energy waste, and support pandemic-ready design and IRMM switchover transitions.

Event Highlights

- **Hands-on training** from the leader in airflow measurement, backed by 40+ years of innovation
- **Practical strategies** to improve indoor air quality, optimize energy efficiency, and ensure ventilation compliance
- **Networking opportunities** with engineers, building owners, architects, energy managers, and other HVAC professionals
- Professional development + **6 PDH** credits
- A **welcome reception** with live product demonstrations, direct access to EBTRON's engineers, product designers, and managers, paired with an open bar and heavy hors d'oeuvres
- An **optional golf tournament**—whether you're a seasoned player or a beginner
- A memorable **President's Dinner at RIOZ Brazilian Steakhouse** to close the event

Seminar Topics

- EBTRON Technology Review
- Comparison to other Technologies
- Indoor Air Quality Fundamentals
- ASHRAE Ventilation Standards
- Infectious Risk Management Mode (IRMM)
- Building Pressurization
- Factors that Influence Outdoor Air Intake Flow Rates
- Airflow Measurement Demonstration
- Outdoor Airflow Rate Determination
- Code Compliance and Liability
- Demand Control Ventilation (DCV)
- Airflow Measurement for Healthcare Facilities
- Airflow Control Strategies

Presenters

David Dougan
President, EBTRON

Dave Dougan has over 40 years of experience with EBTRON, a leading manufacturer of airflow measurement technology. He has been instrumental in designing and developing products that set new industry standards and continues to guide EBTRON's innovation, leadership and growth.

Josh Renegar
Vice President, ESC

Josh Renegar holds a B.S. in Mechanical Engineering from UNC Charlotte and has over a decade of experience in the HVAC industry. His career spans roles in application engineering, sales engineering, and divisional management. As Vice President of ESC, he leads initiatives that deliver innovative, high-performance HVAC solutions.

Who Should Attend

- Building Owners & Facility Managers
- Engineers & Architects
- Contractors & Commissioning Agents
- Energy & Sustainability Managers
- Air Balancers & Testing Professionals

Your team did an outstanding job providing valuable insights into airflow measurement and control and answered many questions that will help us with our customers.

DAVID KELLEHER

Event Details

Hospitality & Transportation

Arrive Wednesday for the optional Thursday golf outing—or Thursday midday for the evening reception and product demonstrations at the House of Blues. Stay at our well-rated, full-service host hotel; complimentary transportation runs to all EBTRON events.

Thursday

Golf Outing (optional)

All skill levels are welcome to participate! We'll play "Captain's Choice" (also known as "scramble"), where all players hit, select the best shot, and continue from there until the hole is complete.

Reception, Product Demonstrations

Experience live demonstration units and connect with EBTRON engineers, designers, and sales staff. Network with industry leaders while enjoying an open bar and hors d'oeuvres at the House of Blues.

Friday

EBTRON Technical Seminar

We'll dive into the core principles of airflow measurement and their role in supporting healthy buildings and optimal IAQ. Attendees receive a behind-the-scenes factory tour featuring production, calibration labs, and demonstrations with EBTRON engineers.

"Low Country" Lunch

Seminar attendees enjoy a "Low Country" lunch prepared by EBTRON staff, showcasing South Carolina's local cuisine from Southern BBQ, deep-fried turkey, chicken bog, and a Low Country shrimp boil. Vegetarian and dietary needs are accommodated.

President's Dinner

The 2-day event concludes with the President's Dinner at RIOZ Brazilian Steakhouse. Enjoy an extensive salad bar followed by continuous table-side service of over 15 cuts of beef, pork, lamb, and poultry, all expertly carved by roaming Gauchos.
