

# Application Driven Smart Display Increases Functionality and Provides a Single Access Point for Up to 16 Measurement Devices

More Applications to Come

IAQ Enforcer™ System SDX-1000 EB-Bus Ethernet Smart Display Panel (SDP) for Compatible EBTRON, GreenTrol, and Approved Third-Party Devices.

- Tablet/phone style interface with factory-installed applications that can be updated and/or added over time using a USB memory device
- 7-inch diagonal capacitive touch full-color display
- Dedicated Ethernet network does not interfere with BAS communications (BAS connections are made to separate analog or network outputs of each measuring device)
- Bidirectional capability allows transmitters to be installed closer to the sensor probes, thus eliminating the need for extended cable lengths
- Updates and new applications can easily be added over time using a USB Type A memory device

Live Display App

STANDARD APPLICATIONS PROVIDED:

- Device Configuration App
- Device Summary App
- EB-Link Reader App
- Live Display App

For additional applications, visit [EBTRON.com](http://EBTRON.com) for more information.

**EBTRON**  
a measurable difference!
