

WHY MEASURE AIRFLOW RATES?

You can't Manage What You Don't Measure!

OCCUPANTS

Maintain contaminants below threshold levels for health, productivity, and comfort

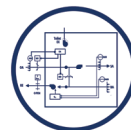

COMPLIANCE

Validate the outdoor air ventilation provided at initial occupancy and throughout operation

ENERGY

Avoid over ventilation, improve DCV operation, and performance of energy transfer systems

CONTROL

Ensure proper air dilution and building pressurization during daily dynamic changes

MONITOR

Improved operations and management for tuned control, FDD, and maintenance needs

EBTRON[®]
a measurable difference!
